

SupaLite

GARDEN & LEISURE BUILDINGS

SupaLite, let us **STEEL** your heart

We deem layout and comfort to be paramount in our homes. So why not in the garden too? It's all possible with our SupaLite Garden & Leisure storage units. Lend your garden the touch of elegance it deserves.

All photographs in this brochure may vary from the actual products

The storage unit is a win-win solution, and is a real eye-catcher to boot. The storage unit is available in different sizes. There is a choice between 3 colours (white, light-grey and anthracite).

4 Eleganto 3330 + Lounge Large right

With the free space in between the inner and outer wall, insulation and utilities can be easily integrated!

STRONG AND DURABLE

The galvanised supporting structure guarantees longevity. Steel is the material of the future.

SECURE

Using steel means safer construction, less maintenance, fewer foundation issues and **no need for heavy construction** equipment.

QUICK AND EASY ASSEMBLY

The system is made up of prefabricated components that are easy to assemble. Brief instruction or a concise manual is all that is needed for quick assembly.

CONTEMPORARY LOOK & FEEL

SupaLite offers a range of finish options **for a contemporary, functional look & feel** that dovetails effortlessly with most building styles and settings.

NO MAINTENANCE

Do it the easy way with an Eleganto garden building. A steel construction requires **less maintenance than a timber one**. Touching up the paintwork is superfluous as the garden building always looks as good as new.

ECOLOGICAL FOOTPRINT

The constructions are **100% recyclable and can be re-used**. Being lightweight in construction, Telluria can be transported very efficiently. The constructions are supplied in kit format. Accordingly, there is no waste or surplus consumption of energy, water or other resources.

STANDARD FEATURES:

- Door with plexi opaque glass (clear)
- Cylinder door lock
- The eaves and the door are in anthracite
- The corners are in anthracite or white
- The eaves are 10cm/15 wide

Height: 260cm.

3663: External dimensions: 358x628cm - Internal dimensions: 330x600cm. Opening of the garage door: 240x200cm.

Sustainable, maintenance-friendly, STEEL garage

You should always be able to count on it. To take you to great parties in the summer. But also to be able to drive around safely in the winter. There are plenty of reasons to take care of it. That's right. Your car. There's nothing more annoying than a car that won't start or is far too hot for you to sit inside.

The solution is a dependable and affordable garage. One that is quick and easy to construct without having to use heavy tools and machinery. One with a modern look and that's been made with the environment in mind. You don't have to worry about the maintenance because the durable materials make it unnecessary.

VENTILATION

The ventilation grille ensures that the room is sufficiently ventilated so that any exhaust fumes or other disturbing odours can easily find their way out.

GARAGE DOOR

The electric door ensures ideal ease of use on both departure and arrival. The motor is equipped with LED lights so you never come home to a dark garage.

DRAINAGE

The garage is equipped with a drainpipe that drains the rainwater away. The garage 3663 has 2 water drain pipes.

INSULATION

The roof of the garage is equipped with insulated steel sandwich panels. The free space between the inside and outside wall allows for full insulation of the garage.

WINDOW

The window provided in the garage has double glazing and brings some light into the darkness.

LOCK

Lastly, let's emphasise safety. The garage has a solid latch and a sturdy lock that together blend beautifully into the gorgeous design of this garage.

COLOURS

The garage is available in three modern colours. White, light grey, and anthracite. There's a colour to suit everyone's preference.

Fence

A modern STEEL fence

We are living with increasing levels of pressure and stress. Often, the only place we can relax is at home. Alone or with our family. And to be fair, we would rather not be disturbed after a busy day if we are looking for some peace and quiet. Our garden is a little piece of paradise that will always be there. So embrace that blissful place. Embrace it sustainably and with both hands. Embrace it with our Garden & Leisure fence.

An elegant solution to guarantee your privacy. The sleek design matches any garden. Whether you have a romantic English garden full of lush flowers, or a sleek garden with trained lime trees and a swimming pond. This fence will provide the finished detail without taking the attention away from your garden.

SupaLite

GARDEN & LEISURE BUILDINGS

Steel is a sustainable construction material

All profiles are made of galvanised (hot-dipped) steel. The steel plates have a 275g/m² zinc layer, ensuring an ELEGANTO garden building never rusts. SupaLite only uses high-grade steel delivered by European suppliers.

These suppliers produce steel using state-of-the-art, efficient processes, from raw material to the finished product. This means we can guarantee you optimum product procurement for in your garden.

Revolutionary STEEL construction system

STEEL OF LIFE

SupaLite's Garden and Leisure Building are made of an easy to install steel construction system. The countless benefits of steel mean this system will play a vital role in the future; with its flexibility the system inspires the realisation of people's dream constructions.

ON-SITE PRODUCTION

All components are of European origin. Our fully standardised and automated production process is continuously monitored, resulting in premium products. The components and constructions are comprehensively and stringently tested, using only high-grade materials. As a result they can cope with extreme conditions (they are fire-resistant, can withstand high winds ...).
